

BGM REAR LIGHT REFLECTOR CONNECTIONS:

Wiring loom BLACK wire from headset – to YELLOW wire on LED panel = rear light

Wiring loom PINK or RED wire from brake light switch – to RED wire on LED panel = brake light

Black wire on the LED panel is the earth wire and must be bolted to bare metal on a Lambretta frame, ideally connected to the mounting point on the Regulator/Rectifier then connected by a loop earth wire to the earth point on the Coil/CDI then connected by a loop earth wire back down to the engine.
